

The Little Footprints **Curriculum**

Welcome to Little Footprints Academy!

Children are brilliant. They are little sponges wanting to soak up all they can. At Little Footprints Academy, we work tirelessly to equip children with the tools and resources they need to flourish and grow into well-rounded little people. We believe children learn through multiple avenues -

- Their environment
- The adults and peers around them
- Songs, stories, and verbal communication
- Outdoor education
- Age-appropriate table activities
for exploration and learning

What We Do

Little Footprints Academy helps children learn and develop through an in-house curriculum designed to meet the needs of each child. We provide opportunities for students to discover their passions and interests through extra-curricular activities, and we also believe in assisting their development with lessons on holistic growth and life skills.

How We Do It

We provide opportunities to learn and grow in all avenues of development and education. Our core pillars of curriculum are science, math, language arts, and extra curriculars.

Science

Science is all around us. We take full advantage of the real-life applications of science through the outdoors, baking and cooking, discussing the stars and space, trying out new experiments, learning about life cycles and discovering and watching how things grow.

Math

Children learn math skills through counting, measuring, weighing, matching, and segregating. We work with them on writing and recognizing numbers. In the older programs, we move on to age appropriate activities based on these foundational concepts, ensuring students feel comfortable with these concepts upon entering kindergarten.

Language Arts

Language is the foundation of learning, and we work diligently to instill an interest in communication right away. Through read alouds, song, stories, and puppet show productions our teachers introduce new vocabulary and encourage and motivate children to read and transition into writing as well! We even involve the parents and families with our Home Reading Program. Take a book, poem, or song sheet home to work with your child every week, then exchange it when done! Children mirror what they see, and we believe if the adults demonstrate the enjoyment that comes from reading, their children will follow suit.

Extra Curriculars

Each and every child is unique, and that means their learning needs are unique as well. We bring outside resources to our children so they can discover new and exciting avenues to practice and hone their skills. Through dance, song, art, drama, and a plethora of field trips and outdoor excursions, our children pursue their interests and find new passions while learning.

See For Yourself!

We know you and your child will fall in love with our program. Come take a look for yourself at all we do by booking a tour of the facility!
